* To qualify for the list, companies must have their headquarters in Atlanta (subsidiaries of other companies are not included); must have 2006 revenue between \$1 million and \$150 million; be at least 51 percent women-owned and must have two-year growth in revenue of more than 50 percent. Companies are ranked by a growth index formula, which is used to even the playing field among companies of different sizes. The revenue and employee growth indexes are the percent change from 2004 through 2006 multiplied by the absolute change for the same years. A company's average employee or revenue growth index is the growth index divided by the average growth index of all companies that qualify. The weighted average growth index is a company's average employee index score plus its average revenue index score. Employee growth was weighted 40 percent and revenue growth was weighted 60 percent.

^ Company submitted a statement of verification supporting figures.
